

The National Domestic
Communications
Assistance Center
in partnership with

Illinois
Mobile Team Unit 12

presents
The
Regional Understanding
Investigative Techniques for
Modern
Telecommunications Course

Participants receive a full day of training from subject matter experts on gathering evidence in today's communications landscape. Participants also receive two full days of training from the FBI Cellular Analysis Survey Team (CAST).

Topics to be covered include the following:

- Conducting a modern communication investigation
- Identifying communication “apps” used by subjects of investigation
- Using today’s communications platforms to further your investigations
- Data Pen Register – Trap & Trace
- Packet Data Intercepts & Collection
- Understand basic principles and concepts of a cellular network
- Interpret and analyze call detail records
- Utilize mapping software to depict the general location of a cellular device when connected to a cellular network
